

BERRY BEAD

Foaming Clearcoat Protectant

DESCRIPTION

With light foam and a blast of berry fragrance this series produces a high beading action. Siliconized carnauba additives create lasting protection and improved shine. This product is specifically designed to be used in high pressure self-serve wax applications.

USAGE INSTRUCTIONS

This product can be applied under high or low pressure, but will show and perform better under high pressure. In self-serve applications the final dilution is 400-500:1. This can be achieved by either pre-diluting and injecting into a high pressure water stream or achieving the final dilution and running through a high pressure pump. When possible use soft water for dilution.

FEATURES

- Pleasant berry fragrance
- Fast acting foam
- Contains siliconized carnauba
- Creates a nice shine on painted surfaces

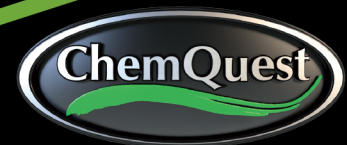

SIZES AVAILABLE

5-gallon pails Code: 10-50043-005
15-gallon drums Code: 10-50043-015
30-gallon drums Code: 10-50043-030
55-gallon drums Code: 10-50043-055
