

# SECTION 1: Identification of the Substance/Mixture and of the Company/Undertaking

#### 1.1 Product Identifier

Trade Name STARTER
Product Form Mixture
Product Code 11-12720

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of Product Acidic Presoak

#### 1.3 Details of the Supplier of the safety data sheet

ChemQuest Inc.

21365 Hamburg Ave.

Lakeville, MN 55024

(877)437-3478

infocq@chemquestinc.com

### 1.4 Emergency telephone number

Emergency Number ChemTrec 1-800-424-9300

# **SECTION 2: Hazards Identification**

### 2.1 Classification of the substance

#### Classification

<b>Hazard Code</b>	Hazard Class	Hazard Category
H301	Acute toxicity, oral	3
H311	Acute toxicity, dermal	3
H314	Skin corrosion/irritation	1B
H317	Sensitization, skin	1
H332	Acute toxicity, inhalation	4
H402	Hazardous to the aquatic environment, acute toxicity	3
H412	Hazardous to the aquatic environment, chronic toxicity	3

# HANDLE IN ACCORDANCE WITH GOOD INDUSTRIAL HYGIENE AND SAEFTY PRACTICES

# 2.2 Label Elements

#### **GHS-US Labeling**

Hazard Pictograms (GHS-US)

# Signal Word (GHS-US): **Danger** Hazard Statements (GHS-US):

H301: Toxic if swallowed

H311: Toxic in contact with skin

H314: Causes severe skin burns and eye damage

H317: May cause allergic skin reaction

H332: Harmful if inhaled

H402: Harmful to aquatic life

H412: Harmful to aquatic life with long lasting effects

### Precautionary Statements (GHS-US):

P260: Do not breathe dust/fumes/gas/mist/vapors/spray

P264: Wash thoroughly after handling

P270: Do not eat, drink or smoke when using this product

P271: Use only outdoors or in a well-ventilated area

# Safety Data Sheet

P272: Contaminated work clothing should not be allowed out of the workplace

P273: Avoid release into the environment

P280: Wear protective gloves/protective clothing/eye protection/face protection

P312: Call a POISON CENTER or doctor/physician if you feel unwell

P321: Specific treatment (see section 4)

P322: Specific measures (see section 4)

P363: Wash contaminated clothing before reuse

P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P301+P310: IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician

P302+P352: IF ON SKIN: Wash with soap and water

P303+P361+P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower

P304+P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing

P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing

P333+P313: If skin irritation or a rash occurs: Get medical advice/attention

P405: Store locked up

P501: Dispose of contents/container in accordance with local, state and federal authorities.

#### 2.3 Other Hazards

No additional information available

#### 2.4 Unknown acute toxicity (GHS-US)

No Data Available

### **SECTION 3: Composition/Information on Ingredients**

#### 3.1 Substance

Not applicable

# 3.2 Mixture

Ingredient Name	CAS#	Composition
Water	7732-18-5	>75%
Ammonium Hydrogen Fluoride	1341-49-7	1-5%
Etidronic acid	2809-21-4	1-5%
Nonylphenol, ethoxylated	127087-87-0	1-5%
Ethoxylated alcohol phosphate ether	68130-47-2	1-5%
Hydrofluoric Acid	7664-39-3	1-5%

#### **SECTION 4: First Aid Measures**

# 4.1 Description of first aid measures

First-Aid measures general Never give anything by mouth to an unconscious person. If you feel unwell, seek medical

advice (show the label where possible).

First-Aid after inhalation IF INHALED. Remove victim to fresh air and keep at rest in a position comfortable for breathing.

Call a POISON CENTER or doctor/physician if you feel unwell. Use artificial respiration and

oxygen if needed. If irritation persists, seek medical attention.

First-Aid after skin contact IF ON SKIN. Wash with soap and water. IF ON SKIN (or hair). Remove/Take off immediately all

contaminated clothing. Rinse skin with water/shower. Call a POISON CENTER or doctor/physician if you feel unwell. Immediately rinse with plenty of water (for at least 15 minutes). Treat exposed area with calcium gluconate 2.5% gel. Get prompt medical attention.

First-Aid after eye contact

IF IN EYES. Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing. Rinse immediately and thoroughly, pulling the eyelids well

and easy to do – continue rinsing. Rinse immediately and thoroughly, pulling the eyelids well away from the eye (15 minutes minimum). Irrigate with calcium gluconate 1% saline solution.

Get prompt medical attention.

First-Aid after ingestion IF SWALLOWED. Immediately call a POISON CENTER or doctor/physician. Rinse mouth. Do

NOT induce vomiting. Dilute stomach contents by drinking water. If vomiting occurs

# Safety Data Sheet

spontaneously, keep head below hips to prevent breathing vomit into lungs. Call physician

immediately.

#### 4.2 Most important symptoms and effects, both acute and delayed

Symptoms/injuries Toxic if swallowed. Toxic in contact with skin. Causes severe skin burns and eye damage. May

cause allergic skin reaction. Harmful if inhaled.

Symptoms/injuries after inhalation Harmful if inhaled.

Symptoms/injuries after skin contact Toxic in contact with skin. Causes severe skin burns and eye damage. May cause allergic skin

eaction

Symptoms/injuries after ingestion Toxic if swallowed.
Chronic symptoms No data available.

#### 4.3 Indication of immediate medical attention and special treatment needed

CALCIUM GLUCONATE GEL: Wearing chemical protective gloves, start massaging 2.5% calcium gluconate gel into the burn site. Apply gel frequently and massage continuously until medical attention is available. Quickly transport victim to an emergency care facility. Double bag, seal, label and leave contaminated clothing, shoes and leather goods at the scene for safe disposal.

# **SECTION 5: Firefighting Measures**

#### 5.1 Extinguishing media

Suitable Extinguishing Media Alcohol resistant foam. Carbon dioxide. Dry powder. Water spray.

#### 5.2 Special hazards arising from the substance or mixture

Fire Hazard The product is not flammable. Explosion Hazard The product is not explosive.

Reactivity Concentrated solution contact with metals will produce hydrogen gas.

#### 5.3 Special hazards arising from the substance or mixture

Firefighting instructions Do not dispose of fire-fighting water in the environment. Exercise caution when fighting any

chemical fire. Use water spray or fog for cooling exposed containers.

Protection during firefighting Do not enter fire area without proper protective equipment, including respiratory protection.

### **SECTION 6: Accidental Release Measures**

# 6.1 Personal precautions, protective equipment and emergency procedures

General measures Evacuate area. Keep upwind. Ventilate area. Spill should be handled by trained clean-up crews

properly equipped with respiratory equipment and full chemical protective gear (see Section 8). If burned in a fire, this product produces extremely corrosive and very toxic hydrogen fluoride gas or fumes. Contact with metals, such as iron or steel, slowly releases extremely flammable and potentially explosive hydrogen gas. Closed containers may rupture violently and suddenly release large amounts of product when exposed to fire or excessive heat for a sufficient period of time. Firefighters should wear a positive pressure self-contained respirator (SCBA) and full-body encapsulating chemical protective suit.

6.1.1 For non-emergency personnel

Protective equipment Wear Protective equipment as described in Section 8.

Emergency procedures Contain the spill. Do not let product enter drains. Evacuate unnecessary personnel.

6.1.2 For emergency responders

Protective equipment Wear suitable protective clothing, gloves and eye or face protection. Approved supplied-air

respirator, in case of emergency.

# 6.2 Environmental precautions

Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or publics waters.

# 6.3 Methods and material for containment and cleaning up

For containment Prevent entry to sewers and public waters. Contain any spills with dikes or absorbents to

prevent migration and entry into sewers or streams.

Methods for cleaning up Contain spill with absorbent material which does not react with spilled material and cautiously

dilute with large excess of water. Provide good ventilation. Contaminated absorbent material will pose the same hazards as the spilled product. Place in a suitable container for disposal in accordance with the waste regulations (see Section 13). Qualified clean-up personnel may

# Safety Data Sheet

neutralize carefully with soda ash or lime. An approved calcium source may be needed to neutralize excess fluoride. Material will fume during neutralization; approach from upwind.

#### 6.4 reference to other sections

No additional information available.

## **SECTION 7: Handling and Storage**

#### 7.1 Precautions for safe handling

Precautions for safe handling

Do not handle until all safety precautions and first aid information have been read and understood. Causes severe burns which may not be readily apparent to any exposed areas. Treat any exposures. Wear proper safety equipment including chemically resistant gloves, goggles and face shield. Protective outerwear is highly recommended. Use only with adequate ventilation. Do not move to unmarked containers. Do not use metal containers. This product is incompatible with glass, alkaline materials and most metals. This product may release hydrogen gas in contact with some materials, therefore keep away from sources of ignition.

### 7.2 Conditions for safe storage, including and incompatibilities

Storage conditions

Store locked up. Store in approved containers only. Do not store in metal or glass containers. Do not store in direct sunlight. Empty container may contain hazardous residue. Do not add any other material to the container. Do not wash down the drain. Do not get in eyes, on skin, or on clothing. Wash well after use. Handle in accordance with good storage and handling practices. Do not allow smoking or food consumption while handling. Keep container in a cool, well ventilated place away from heat sources and incompatible materials (See Section 10.5). Keep container tightly closed.

#### 7.3 Specific end uses

No additional information

# **SECTION 8: Exposure Controls/Personal Protection**

## 8.1 control parameters

No OSHA and ACGIH PEL's or TLV's for the listed ingredients of this product unless listed stated below:

Hydrogen fluoride (as F), CAS # 7664-39-3				
OSHA PEL (TWA)	OSHA PEL (STEL)	OSHA PEL (Ceiling)	ACGIH-TLV	
3 ppm	Not Established	Not Established	0.5 ppm (TWA),2 ppm(Ceiling)	

#### 8.2 Exposure Controls

Personal protective equipment Protective safety glasses or goggles. Chemically resistant gloves. Protective clothing. Face

shield. Respiratory protection of the dependent type.

Hand protection Chemical resistant gloves.

possibility exists for eye or face contact due to spraying liquid or airborne particles.

Skin and body protection Wear long sleeves. Wear suitable protective clothing. Face shield when possibility exists

contact due to spraying liquid or airborne particles.

exceeding exposure limits.

### **SECTION 9: Physical and Chemical Properties**

# 9.1 Information on basic physical and chemical properties

Appearance Tinted Liquid
Color Orange
Odor Orange

Odor threshold No data available

pH 1.5

Relative Evaporation rate (butyl No data Available Melting point No data Available Freezing point No data Available

# Safety Data Sheet

Boiling point No data Available No Data Available Flash point No data Available Self ignition point No data Available Decomposition temperature Flammability (solid, gas) No data Available No data Available Vapor pressure No data Available Relative vapor density at 20° C Relative Density 1.046 g/ml Solubility Water soluble Log Pow No data Available Log Kow No data Available Viscosity: Kinematic No data Available No data Available Viscosity: dynamic Explosive properties No data Available No data Available Oxidizing properties No data Available **Explosive Limits** 

### 9.2 Exposure Controls

No additional information available

### **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

Contact with reactive metals (e.g. aluminum) may result in the generation of hydrogen gas.

#### 10.2 Chemical Stability

Stable under recommended handling and storage conditions (see section 7).

#### 10.3 Possibility of hazardous reactions

Corrosive in contact with metals. Contact with metallic substances may release flammable hydrogen gas. Contact with strong Bases will cause excessive heat and splattering.

#### 10.4 Conditions to avoid

None known

#### 10.5 Incompatible Materials

Avoid contact with: glass, water, metals, alkalis, oxidizers, strong bases, strong acids, inorganic acids, inorganic bases, and strong reducers

# 10.6 Hazardous decomposition products

Thermal decomposition can result in: phosphines, hydrogen gas, hydrocarbons, carbon oxides, carbon dioxide, toxic fluorides, nitrogen oxides, carbon monoxide, hydrogen fluoride, organic compounds, toxic ammonia fumes, oxides of phosphorus, and organic compounds which may be toxic

#### **SECTION 11: Toxicological information**

# 11.1 Information on toxicological effects

Oral LD50: 227 mg/kg (rat) Calculated

Dermal LD50: 225 mg/kg (rabbit) Calculated

Inhalation LD50: 2.12 mg/l (Dust/mist (Rat)) Calculated

Skin Corrosion/irritation Causes severe skin burns and eye damage
Serious eye damage/irritation Causes severe skin burns and eye damage

Respiratory or skin sensitization May cause allergic skin reaction

Chronic symptoms	Not Classified

Additional Information

The fluoride ion from hydrofluoric acid reduces serum calcium levels, which can cause severe injury and possibly fatality throguh hypocalcemia. HF is highly destructive to mucous membranes, skin, bones, eyes and the upper respiratory tract. Dammages caused by HF may NOT be immediately noticable by pain or blistering, so take extra precaustion when handling. HF attacks the body slowly, so the full extent of tissue damage may not be noticed for 12-24 hours after contact. (See Section 4 for First Aid guidelines)

# **SECTION 12: Ecological information**

### 12.1 Toxicity

No Data

#### 12.2 Persistence and degradability

No Data

#### 12.3 Bioaccumlative potential

No Data

#### 12.4 Mobility in soil

No Data

#### 12.5 Other adverse effect

No Data

# **SECTION 13: Disposal Considerations**

### 13.1 Waste Treatment methods

Waste treatment methods Do not discharge to public wastewater systems without permit of pollution control authorities.

No discharge to surface waters is allowed without NPDES permit.

Waste disposal recommendations Dispose in a safe manner in accordance with local/national regulations. Do not allow the

product to be released to the environment.

### **SECTION 14: Transportation information**

#### 14.1 UN number, proper shipping name, class and packaging groups.

**Domestic Ground Non-Bulk Shipments** 

UN2817, AMMONIUM HYDROGENDIFLUORIDE, SOLUTION, 8, (6.1), II
